- ✓ SQL server 2018
- ✓ Eclipse
- ✓ IntelliJ IDEA

ACADEMIC PROJECT

MSc IT Project Name: Digital Voting System using Blockchain

This project uses a Blockchain-based solution to address all of the problems of traditional elections. Theoretically, vote security and data integrity are guaranteed. Another need that is met in the system is voter privacy. Blockchain based voting uses a tamper-proof personal ID and an encrypted key. Electronic credibility services have evolved into a necessary component of the information landscape. It is feasible to develop more complicated systems that rely on them, such as the electronic voting system, with the reliable execution of essential services such as electronic signature and electronic authentication.

FEATURES: -

- ✓ User Registration/Login
- ✓ Admin Login
- ✓ Voter's security, privacy and data integrity of votes.
- ✓ You can vote anytime/anywhere (During Pandemics like COVID-19 where it's impossible to hold elections physically).

BSc IT Project Name: Wedding Photography Website

To create an advanced technology for a wedding photography website which can provide the most services like booking, online reservations and can also provide pictures and albums. The goal and objective of the project was to save time and make people aware about smarter way of booking photography and also provide various advanced features of photography level for better understanding of the images.

FEATURES: -

- ✓ User Registration/Login
- ✓ Admin Login
- ✓ Bespoke design or a well-customized theme
- ✓ Easy Booking and Online Reservations
- ✓ Professionals Photography Genres

Project during Jspiders training: A Complete Liquor Management System

Till now by using core java concept have completed the project. Firstly, the customer needs to register to shop online. Secondly, the customer will log in to the system with his/her username and password. Customers will see the category of hard drinks like whiskey, vodka, beer, etc. Eventually, customers can shop the drinks and can see their price. By selecting Alcohol and wine Order, the system displays a list of Available branded alcohols and wines and the user has to place an order with item quantity.

FEATURES: -

- ✓ User Registration/Login
- ✓ Easy shopping
- ✓ Display total cash
- ✓ Instant Order Preview
